

# LINGI2141 - Individual Project Analysis of JDownloader Protocol

JULIEN COLMONTs

Université Catholique de Louvain

## Abstract

*This paper will deal with analysing the networked application JDownloader which is a download manager for a large number of hosting sites.*

## I. INTRODUCTION

JDownloader is a cross-platform download manager written in the Java programming language. It supports about 110 one-click

hosting sites, is able to solve some CAPTCHAs, can deal with several parallel downloads and multiple connections. JDownloader is also free and open-source.
